Drawing

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “response detector”, and the “call set-up emulator” in claim 1, lines 15, and 21 respectively must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: the description of figures 1 and 2 in the specification from pages 22-31 are incorrect. Corrected drawing sheets in

Art Unit: 2665

compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 6, and 8 are objected to because of the following informalities:

Regarding claim 6, it's unclear to which claim, claim 6 will be dependent to.

Regarding claim 8, the claimed apparatus of claim 1 seems to locate at one of the subscriber stations. However, the communication resource availability determiner seems to refer to the resource allocator 326-fig. 3 of the access processor 322-fig. 3, which is obviously not a part of the apparatus, therefore the preamble of claim 8 seems to create confusion at the language "the apparatus ... further comprising a communication resource availability determiner".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "said subscriber station" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

4. Claims 1-2, 5, 7, and 9-14 are allowed.

5. Claims 3-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action.

6. Claims 6, and 8 are objected to as being independent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Phillips (US 6,181,715); Freeman et al. (US 5,390,232); Grube et al.(US 5,125,103) are cited to show a method for establishing a priority call in a fixed wireless access communication system, which is considered pertinent to the claimed invention.
